Computer Vision, Image Processing, Deep Learning, Machine Learning

## PROFILE

I am a motivated Computer Science and Engineering graduate ready to start my career. My long-term professional aim is to work for an ambitious company that allows me to grow and improve.

## PROJECTS

### Selfcare Android App [↗](#)

The Selfcare app is a mobile application designed to empower individuals to take charge of their health and promote self-care. It provides users with a comprehensive platform to manage their health, monitor their progress, and access relevant resources.

### Step Counter App [↗](#)

This Step Counter app is an Android application that counts the number of steps taken by the user using the step counting sensor on their device. The app features a clean user interface with a step count display, a chronometer, a progress bar, and a goal tracker.

### PC Builder Webpage [↗](#)

PC Builder is a web application that allows users to select and customize their computer components. This project is developed for Quantum Technology Bangladesh co-created with Nexttech Ltd.

### Gvaly Website [↗](#)

Gvaly is a modern E-commerce Website crafted with PHP, CSS, HTML, and JavaScript. It offers seamless user authentication, a diverse product catalog, an efficient shopping cart, and responsive design. Explore and contribute to a dynamic shopping experience.
